A Day of Discovery at **HeveaBoard Berhad**

🌳 From Rubberwood to Furniture — Learning Beyond the Classroom

What happens to rubberwood before it becomes the furniture we use every day?

On 24 October 2026, HeveaBoard Berhad was delighted to welcome 40 students from Standards four until Standard Six, accompanied by their teachers from SRJK (C) Chi Hwa Seremban, for an educational visit to our factory to discover the answer!

The visit was designed to introduce the younger generation to the wood-based panel industry, offering insights into how raw materials are processed and converted into useful products that support the furniture and interior design sectors.

Through this experience, students were encouraged to look beyond the furniture they see at home and understand the manufacturing journey behind the products they use every day.

🏘 Learning Beyond the Classroom

At HeveaBoard, we believe that education extends beyond textbooks and classrooms. Exposure to real industrial environments helps students develop curiosity, broaden their knowledge, and appreciate how different industries contribute to everyday life.

We were pleased to see the enthusiasm and interest shown by the students and teachers throughout the visit. Their participation made this educational session a meaningful opportunity for interaction, learning, and knowledge exchange.

🏭 A Closer Look at Particleboard Manufacturing

During the visit, the students and teachers were introduced to the particleboard manufacturing process and learned more about how wood-based materials are transformed into useful products for furniture, interior design, and everyday applications.

Through this educational experience, the students had the opportunity to gain a broader understanding of manufacturing operations, industrial processes, and the role of the wood-based panel industry in supporting the furniture and construction sectors.

The visit also provided a valuable opportunity to introduce the younger generation to the importance of responsible resource utilisation, product innovation, and sustainable practices in modern manufacturing.

Growing Together with Our Community

Photo" Refreshments for the visiting teachers and students before them departure back.

HeveaBoard Berhad would like to extend our sincere appreciation to the teachers and students of SRJK (C) Chi Hwa Seremban for taking the time to visit our company. We would also like to express our gratitude to our Managing Director and the team members who contributed their time and effort to make this educational visit a meaningful and memorable experience.

We looks forward to continuing our community engagement initiatives and creating more opportunities to share knowledge, inspire young minds and strengthen the connection between education and industry. We also believe that inspiring the next generation begins with sharing knowledge, encouraging curiosity and building a better future together.
